

Improving Organizational Results

According to multiple research findings, 40%-70% of projects fail to achieve at least one success metric. Often this is a reflection of not having an effective approach to all aspects of organizational project management. It's all too easy to focus solely on execution and rely heavily on the skills of a few individual project managers — without providing the support needed across the organization to successfully deliver mission critical projects, aligned with your strategy, with consistent results.

As project management experts, we've seen far too many businesses struggle to successfully deliver high-performing projects that meet their goals. We also know it's difficult to assess how well things are working while you're actually doing the work. It's often easier to chip away at the more obvious issues than it is to address the root causes needed to implement lasting — and more transformational — change.

Clarizen Evolve was designed to quickly deliver insights and recommendations that can provide immediate benefits and ensure you're developing an organizational project management practice that's aligned with your strategy.

Key Benefits

- Streamlined project methodology aligned with strategic goals
- Engaged, more efficient workforce
- Increased visibility with ability to make data-driven decisions in real time
- Enhanced project performance and results
- Improved, more accurate budget management

"In just a couple of months, the process we went through with Clarizen Evolve has galvanized our entire PM organization and completely changed how we work — all for the better."

— Head of IT PMO

How Does Clarizen Evolve Work?

Our goal is to help each of our customers transform their project management practice by strengthening the alignment across strategy, project management methods, processes, and technology to deliver more impactful business results. Throughout the process, we will:

- Assess the three essential organizational project management areas
- Align these areas with your executional practices
- Confirm alignment with your organizational strategy

The Clarizen Evolve Process

In a few short weeks, we'll have you on your way to delivering more impactful projects. We'll evaluate your current practices, uncover problem areas and methodology gaps, and provide you with a comprehensive report that includes a detailed action plan for addressing each area according to where you'll benefit the most.

- 1 PM Effectiveness Assessment**
High-level evaluation of current practices to identify gaps, project risks impacting your budget, and strategic priorities
30 minutes
- 2 Evaluate Processes & Effectiveness**
In-depth interviews to uncover common pain points across the team and strategic areas for improvement
2-4 days
- 3 Report: Detailed Recommendations and Action Plan**
Specific suggestions and priorities for improving organizational methodology, implementation and governance
2 weeks post workshop
- 4 Implementation (upon approval of the action plan)**
We're available to help you implement the recommendations, so you can quickly realize the benefits

Reach out to schedule your initial assessment meeting today by contacting us at evolve@planview.com.

Organizational Project Management Fundamentals

METHODOLOGY

The essential foundation for providing consistency in project delivery, learning and improvement. We'll work with you to improve and apply an existing methodology or define one if necessary.

IMPLEMENTATION

Frequently organizations have a defined methodology that isn't put into practice, resulting in below-average project delivery. The application of the defined methodology is of paramount importance to a successful project.

GOVERNANCE

The final and most important condition is project governance. Lack of governance results in low adherence to methodology, reducing clarity and visibility to the organization which results in poor project performance.

About Clarizen

Clarizen connects work across the enterprise, turning ideas into strategies, plans, and action. With Clarizen, organizations can work the way they want to work and have real time visibility into all their workstreams. This keeps teams focused on the things that matter, delivers results faster, and helps them exceed their company goals and customers' expectations.
